

mulimed – otoscillo®

Mulimed-OTOSCILLO is a device for flushing the ear canal to removal of the earwax. Otosillo has a built-in pump, which pumps water at a pulse stream. This allows the device is more effective. Cleaning the ear using this device does not cause pain for the patients. Otosillo removes earwax more effectively then traditional methods and is easy to use. The set includes two interchangeable nozzles and a thermometer.
